PROFESSIONAL SUMMARY

Hands-on Software Developer eager to collaborate with customers and fellow developers to find optimal solutions. Enthusiastic about learning new technologies and tooling to make software development easier and adaptive.

EXPERIENCE

JAN 2021 -

JUNIOR FULL STACK DEVELOPER, FREELANCE

- Updated old code bases to modern development standards, improving functionality. Achieved this by implementing DRY (Don't Repeat Yourself) principles as well as code refactoring.
- Collaborated on different stages of systems development lifecycle from user requirements gathering to production releases by application of Agile methodologies.
- Participated in software testing through test driven and behavior driven development to verify performance of applications and software.
- Came up with clear specifications for project plans using customer requirements.
- Developed desktop and mobile responsive web applications.
- Led version control efforts for my personal projects, employing public and open-source repositories primarily through Git and GitHub.
- Contributed ideas and suggestions in team meetings and delivered updates on deadlines, designs and enhancements.
- Generated functional databases, applications and APIs to support websites on back-end.

AUGUST 2016 – DECEMBER 2016

DATA SPECIALIST, DAPROIM AFRICA

- Coded and processed applications into required electronic formats.
- Searched, extracted and interpreted information to determine correct input procedure.
- Completed data entry tasks with accuracy and efficiency.
- Verified accuracy of data before transcribing.

EDUCATION

JULY 2022

CERTIFICATE – SOFTWARE DEVELOPMENT, MORINGA SCHOOL

DECEMBER 2020

BACHELOR OF ARTS ECONOMICS, UNIVERSITY OF NAIROBI

DECEMBER 2014

KCSE B+, NKUBU HIGHSCHOOL

SKILLS

- Vast knowledge and understanding of HTML and CSS. I have the ability to develop modern and responsive web applications using CSS frameworks such as Tailwind CSS and Bootstrap.
- Clear understanding of JavaScript and jQuery for the development of functional web applications.
- Proficient in Angular for frontend web development.
- Adept in Python and Flask framework for the development of microservices.
- Prowess in Django for backend web development.
- Experienced in developing RESTful API's and testing them using Postman.
- Extensive understanding of graphical design applications such as Adobe Illustrator, Adobe Photoshop, Adobe XD, Figma and Canva.
- Competent in relational database management systems like PostgreSQL.
- Basic knowledge of Java and React.
- Managed teams in the capacity of a scrum master in a coding bootcamp to develop and present applications within set timelines.
- Coordinated and communicated effectively with developers remotely to come up with web applications that met user stories and objectives.
- Came up with well documented and analyzed product documentations for easier comprehension of software
- Adapted to dynamic project deadlines while at a coding bootcamp, to develop web applications within short periods of time by managing my time well.

EXTRACURRICULAR ACTIVITIES

- Treasurer of a youth, community-based organization that helps network young people with leaders and scholars in my constituency.
- Volunteer work at Orolyne care, a charity organization
